

# Project Assessment

## Feedback and scoring

**Team Name or Individual:** Team J

Please score the solution based on the criteria in the grid below.

*Legend: 1=Below expectations, 2=Improvement Needed, 3=Meets Expectations, 4=Exceeds Expectations, 5=Exceptional*

Criteria	Score	Comments
<b>Data model</b> <ul style="list-style-type: none"> <li>• good choices</li> <li>• well organized graph</li> </ul>	5	Relationship graph is organized and color-coded. Data model is using naming conventions. Good use of global fields and temporary tables.
<b>User interface</b> <ul style="list-style-type: none"> <li>• attractive and intuitive</li> <li>• executed well</li> <li>• consistent themes and styles</li> </ul>	4	Overall nice UI. Simple, clean. Generally good use of color. Created and used custom theme. Effort was made to create desktop and mobile screens
<b>Workflow</b> <ul style="list-style-type: none"> <li>• logical</li> <li>• business process oriented</li> </ul>	3	Some UI/UX choices make for some minor issues (e.g. no apparent way to create client without searching). But overall simple, intuitive, and straightforward.
<b>FM Mechanics</b> <ul style="list-style-type: none"> <li>• writing calculations and scripts efficiently</li> <li>• naming conventions</li> <li>• comments</li> </ul>	4	While simple scripts lack comments, more complex ones do have them as needed. Naming conventions seem consistently applied. Scripts are logically organize. Some minor scripting mishaps and bugs.
<b>Security</b> <ul style="list-style-type: none"> <li>• access privileges</li> <li>• user management</li> </ul>	3	Good use of security model.
<b>Business Objective</b> <ul style="list-style-type: none"> <li>• responsive to the use case</li> <li>• met project requirements</li> <li>• solved the problem</li> </ul>	3	Met most of the project requirements.
<b>Total score (out of 30)</b>	<b>22</b>
